

ViGoods

PLYWOOD EXPORT · VIETNAM

BUYER CATALOG · 2026 WORKING EDITION

Vietnam plywood programs, built on *evidence* — not promises.

ViGoods coordinates commercial and packing plywood orders through a verified network of partner factories in northern Vietnam — one accountable partner from specification to shipping documents.

WHAT WE ACTUALLY DO

We manage the factory side, so you deal with one accountable partner.

ViGoods is a sourcing and export coordination company established in Thái Nguyên, Vietnam in 2023. We do not claim partner factories as our own — we select them per order, control the specification, and document every step from log yard to container. Every photo in this catalog comes from ViGoods' own operating archive: real orders, real factories.

2023

Figures reflect ViGoods' internal order archive (2023 – 2025), not audited revenue.

01

Buyer requirement

Size, thickness mix, core, face, glue, tolerance, destination
port and target volume.

02

Factory selection

The right partner factory for this exact product, checked for
capacity and price.

03

Commercial alignment

One written specification, sample reference, terms and
timeline — before production.

04

QC & export follow-up

Production checks, loading evidence and a complete
shipping document file.

SHIPPED ROUTES Hai Phong → Mundra · Nhava Sheva · Chennai · Kattupalli · Laem Chabang · Expanding:
Gulf markets

Commercial plywood

General-purpose panels for importers, distributors, furniture and interior applications. Face and grade are locked by an approved physical sample before production — never a stock photo.

Panel size	2440 × 1220 mm standard · other sizes by order review
Thickness	3 – 25 mm · final tolerance in signed specification
Face	Bintangor or selected engineered veneer
Core	Eucalyptus, acacia or controlled mixwood
Glue	MR · E0 – E2 options by program
Use	Furniture · interiors · trading programs
Control	Approved face sample + core construction photo

Packing plywood

A cost-controlled panel program for crates, pallets, casework and protective packaging — engineered to protect the load, not to look pretty. Loading yield is optimised per container.

Panel size	2440 × 1220 mm + custom sizes
Thickness mix	Custom mix per container · optimised for volume
Construction	Selected by load and end use · load-rated
Glue	MR · E2
Surface & repairs	Limits written into the specification
Loading	40'HQ typical 45 – 47 m³ · evidence tied to packing list

Bintangor face plywood

Face-grade programs for buyers who resell on appearance: grade agreed against a physical approved sample. Melamine-faced options available within the same program.

Face grade	By approved sample
Core	Eucalyptus / acacia options
Glue	MR · E0 – E2 · Melamine options
Sanding	Calibration on request
QC	Pre-shipment photo & measurement records
Use	Trade & distribution programs

Every quotation needs these six decisions.

Send these six points with your inquiry and you get a quotation we can actually honour — usually within two working days.

PANEL SIZE 2440 × 1220 mm (8 × 4 ft) Other sizes by order review	THICKNESS Common export mix 3 – 25 mm Final tolerance in signed specification		
CORE OPTIONS Eucalyptus · Acacia · Mixed hardwood Construction matched to use and price point	FACE OPTIONS Bintangor · engineered veneer · Melamine Grade confirmed by approved sample		
GLUE MR / E0 – E2 options by program Test requirement must be stated before quote	PACKING Export pallets, straps, edge protection Marks and label plan by buyer		
HS CODE 4412	LOADING PORT Hai Phong, Vietnam	CONTAINER 40'HQ · 45 – 47 m³	PAYMENT T/T with deposit · terms per order

We follow the panel through the whole chain.

Photos below were taken at partner mills and factories ViGoods works with in northern Vietnam — the same chain your order moves through.

01 Log yard

Eucalyptus and acacia logs sourced in the northern plywood belt.

02 Veneer peeling

Logs are peeled into core veneer at partner mills.

03 Drying

Core veneer is dried before grading and assembly.

04 Assembly & pressing

Cores are laid up, glued and pressed to specification.

05 Finished stock & loading

Panels are calibrated, packed and loaded under a documented plan.

What a buyer receives before a repeat order.

ViGoods structures QC evidence by factory, product, order and date. A photo is useful only when it belongs to a named order.

01 Written product specification

Prepared per order

02 Approved sample reference

Prepared per order

03 Production & QC photo set

Prepared per order

04 Container loading plan

Prepared per order

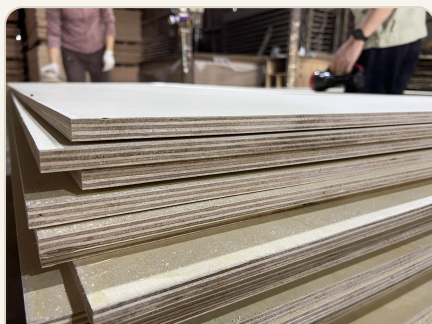

05 Commercial & shipping documents

Full checklist

Buyers can ask for measurements, surface references, core photos, packing and loading evidence according to the agreed checklist. Factory visits can be arranged with active buyers.

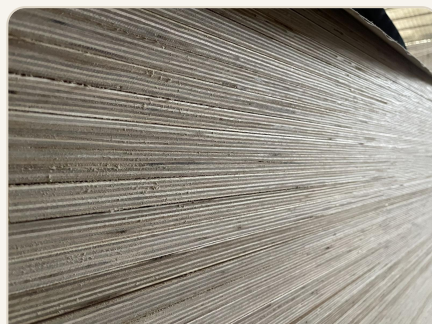

Real orders. Real factories. Photographed as they happened.
